

Timber Shook

Cut to length (CTL) timber components produced to your specifications

Tumu Timbers are your one stop shop for shook cut to length timber products. Tumu Timbers has invested in the latest processing, grading and machining technology to produce shook to specific dimensions, lengths and profiles. We can also produce shook in different timber grades with either a rough sawn or machined finish.

We manufacture a wide range of shook components for both the domestic and export markets

Feature	Advantage	Benefit
Digitally graded timber shook components	Consistently accurate timber grading.	Graded to customer specific requirements.
Large capacity cutting and state of the art processing operation	We are able to efficiently process large volume orders whilst maintaining high quality standards.	Reliable supply during your peak seasonal demand.
ISO 9001 Accredited manufacturing processes	Quality management systems control all aspects of the manufacturing process.	Assurance that products will meet or exceed specification.
Heat Treatment for Export	Heat treatment in our Windsor Kiln.	Guaranteed export compliance.
	No chemicals used in the Heat Treatment process.	Organic compliance.
Timber Preservation	Modern fully automated Treatment Plant offering a range of treatment options.	Accuracy of preservative penetration and retention. Quick product turnarounds.
	25 year guarantee (limited) provided for all tanalised product which is backed by our chemical supplier.	Peace of mind over product longevity and reliability.

Our preference is to source our timber from sustainable (FSC® registered) forests and sawmills.
