

Quality wholesale timber from sustainable sources

Tumu Timbers processes and supplies a wide range of treated and specialist timber products for trade, landscape and rural application. We supply to merchants and resellers and we have built strong industry-wide relationships to ensure that our customers enjoy high quality timber and competitive purchasing rates.

We treat our timber to a range of hazard classes including H3.2, H4 and H5. Our timber treatment process is independently audited by AsureQuality and complies with the applicable New Zealand treatment standard. In addition, our treated timber is supplied with a 25 year treatment guarantee (limited) which is backed by our long term chemical supplier. As a result, our customers are assured that our timber is treated to a high standard.

Timber Range

Product	Advantage	Benefit
Merch, No. 2	Graded to Merch, No. 2 by experienced, qualified graders with external auditing.	Assurance that our timber is graded to standard.
Battens and Stakes	Digitally graded timber.	Accuracy of length, dimension, grade and specification.
Pegs	Digitally graded timber.	Accuracy of length, dimension, grade and specification.
Decking, Posts, Palings, Rails and TGV	Timber is air dried in our yard to achieve desired moisture content for treating or machining.	Visually pleasing with no resin staining on the timber.

Our preference is to source our timber from responsible (FSC® registered) forests and sawmills.
